

EPOXY PRIMER

Sani-Tred's Epoxy Primer is a versatile liquid epoxy designed for priming a wide range of substrates, including acrylic, glass, porcelain, granite, marble, and PVC. This easy-to-apply primer is low-odor, low-VOC, solvent-free, non-toxic, and non-hazardous, making it safe for use in areas frequented by children and pets once the epoxy has cured.

One of the key benefits of this primer is its rapid cure time. It cures completely tack-free overnight, even in cold temperatures, and at average temperatures, it achieves a fully cured, non-tacky finish in just four hours.

This two-part primer is highly durable, resisting abrasion and withstanding negative hydrostatic pressure and moisture vapor drive. It is also resistant to most oils, caustics, acids, and more. Sani-Tred Epoxy Primer is stable in extreme cold, ensuring that storage does not compromise the chemical composition.

Once applied, the primer is completely waterproof, providing excellent protection against moisture. Its durability and resistance make it ideal for sealing, as a base coat, or for use over repaired areas.

ACCESSORIES:

3/8" NAP ROLLER COVER

SKU# RL-4341

9" ROLLER FRAME

SKU# RL-4335

WOOD HANDLE W/THREADED TIP

SKU# TL-7393

GREAT BENEFITS

- Exceptional Adhesion
- Low-viscosity formula allows it to penetrate deeply into pores
- Easy Application
- Contributes to a finished system that resists moisture and abrasion
