

HYDROPOLISH

The Concrete Protector's Hydropolish is a revolutionary solution that tackles one of the biggest challenges in concrete polishing: stain resistance. Even the most beautiful polished concrete surfaces can be vulnerable to oils, acids, and common spills like wine or coffee.

Hydropolish penetrates concrete pores and reacts to form watertight silicone molecules, providing durable protection. When used alongside Scientific Concrete Polishing's Sealer and Fortifier, it creates a triple-tight seal, ensuring that everyday spills won't compromise the appearance of polished floors, giving both you and your customers confidence in long-lasting results.

ACCESSORIES:

SAMSON
SKU# WE-2618

SMK-H100 WATER AND OIL SPRAYER
SKU# TL-7243

SCP CUTTER
SKU# SCP-6103

SCP SEALER
SKU# SCP-6113

SCP HARDENER
SKU# SCP-6107

GREAT BENEFITS

- Neutral PH Formula
- Low VOC
- Fast Beading Action
- Excellent Water Repellency
- Meets California South Coast AQMD Requirements
- Water-Based
- Easy to Use
- Dilutable
- Dilution Stable
- Effective at Concentrate as low as 3% Actives
- No SiH Vented Containers Required
