

CP OIL GUARD PRIMER

The Concrete Protector’s Oil Guard Primer is a two-component epoxy-amine undercoat specifically formulated to be compatible with petroleum-based oils and greases. On many concrete floors, petroleum can penetrate deeply, making it impossible to remove completely with surface cleaning alone. If left untreated, trapped oil can migrate back to the surface, leading to delamination.

Oil Guard Primer penetrates the concrete, bonding with and locking in surface contamination, creating a stable, clean substrate for the application of epoxy flooring and coating systems.

ACCESSORIES:

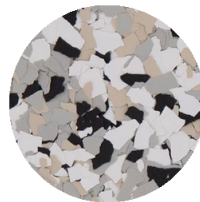

WOOD HANDLE THREADED
Sku# TL-7395

WTF ROLLER
Sku# RL-1001

1/8" NOTCH SQUEEGEE
Sku# TL-7103

COLOR FLAKES

PROTECTORTHANE
Sku# UT-4449-UT-4483

GREAT BENEFITS

- Barrier against oil
 - Stops oil “bleed back”
 - Compatible with a wide range of coating systems
- Can be topcoated same day
 - Resists petroleum-based oil
 - Chemical resistant
