

## EASY COVE

Easy Cove is a precision-engineered cove base molding specifically designed for the resinous flooring industry. It offers a superior alternative to traditional hand-troweled or existing precast cove moldings, delivering enhanced performance and ease of installation.

Featuring innovative interlocking technology, Easy Cove provides multiple advantages for both floor and wall coating applications. Thousands of linear feet can be installed in a fraction of the time required for traditional trowel-down or other precast cove bases. Its unique “no-caulk” lip bevel eliminates the need for finishing caulk—simply adhere to the wall with the recommended adhesive and apply your coating. Easy Cove can be easily mitered to any angle, accommodating both inside and outside corners with ease.

### GREAT BENEFITS

- Superior Bond Strength
- Fire-Resistant
- Watertight Design
- Customizable
