

# FLEXKRETE

FlexKrete is a high-performance concrete repair material that delivers real results. This fast-setting formula allows traffic in under an hour, achieves strengths three times greater than standard concrete, and offers exceptional adhesion. Engineered for unmatched durability, FlexKrete resists cracking, debonding, chipping, or popping, even under extreme wear.

Ideal for deep repairs, feather-edged patches, or overlay applications, FlexKrete provides a long-term solution for concrete restoration. A single product can be used to repair concrete, asphalt, wood, or steel on horizontal, vertical, and overhead surfaces—saving significant time compared to traditional methods. It eliminates the need for full tear-out or new rebar.

Non-toxic and capable of curing in temperatures below zero degrees Fahrenheit, FlexKrete is perfect for freezer rooms or cold-weather environments. Its proven toughness has made it successful in some of the most demanding settings, including highways, bridges, concrete joints, freight terminals, loading ramps, decks, and walkways subjected to heavy forklifts and high-impact traffic

## ACCESSORIES:

### FUME SILICA:

FK-717

### FLEX TEMP:

FK-715

### CATALYST:

FK-701

### FLEX POLYUREA SEAL 100:

FK-703

### SAND:

FK-719

### CHIP BRUSH:

RL-4343

### FLEX PRIME:

FK-709

## GREAT BENEFITS

- Use in deep holes, feather-edge, or overlays
- Will cure at temperature below 0 degrees F
- Non-toxic
- Very resilient and durable
- Can be used to level concrete
