

PROTECTORTHANE

The Concrete Protector's ProtectorThane is a two-component polyurethane formulated for outstanding flexibility, weather resistance, and UV stability. It also provides excellent abrasion and chemical resistance, making it a key element of The Concrete Protector's Resinous 123 System.

The Resinous 123 System is an ideal solution for large areas where a seamless, clean-floor appearance is desired. It combines The Concrete Protector's Epoxy Base Coat with a colored ProtectorThane layer and can be finished with a clear urethane topcoat. This system delivers a durable, USDA-compliant seamless flooring surface, making it perfect for commercial and industrial facilities.

ACCESSORIES:

1/8" NOTCHED SQUEEGEE
SKU# ET-7255

WTF TOPCOAT ROLLER
SKU# RL-1001

ROLLER FRAME
SKU# RL-4319
