

## ELASTATHANE UV

Elastathane UV is a 100% solids, single-component aliphatic binder designed for EPDM rubber granules where superior UV resistance is needed. It is a key component of The Concrete Protector's ElastaStone System, combining this durable UV-resistant binder with EPDM rubber to create a long-lasting, resilient safety surface.

Elastathane UV offers exceptional UV stability, ensuring the surface won't yellow in sunlight and maintaining consistent color when mixed with black EPDM rubber. Additionally, this versatile product can be used as a topcoat to restore the original shine and luster of existing coatings.

### **ACCESSORIES:**

**BLACK EPDM RUBBER GRANULES**  
SKU# ES-5707

### **GREAT BENEFITS**

- Has excellent UV stability and the surface will not yellow in the UV
- May be used as a topcoat to bring back original luster
- No color change is noticeable when mixed with black EPDM rubber
