

VITAL OXIDE

The Concrete Protector's Vital Oxide is a colorless, odorless, EPA-registered disinfectant that works quickly and effectively to eliminate viruses, bacteria, and mold. Commonly used in healthcare facilities and hospitals, Vital Oxide kills 99.9% of bacteria and viruses while also destroying fungus, mold, and mildew at the source and helping to prevent future growth. It sanitizes up to 99.999% of bacteria on food-contact surfaces with no rinse required and eliminates odors at the molecular level rather than masking them with fragrances.

Vital Oxide can be used in a wide range of areas, including shower stalls, under sinks, kitchen counters, diaper pails, schools, daycare centers, sports equipment, and basements—anywhere mold or bacteria may be present. It is also highly effective at removing tough odors such as tobacco smoke, pet urine, cooking smells, and odors from sports equipment.

GREAT BENEFITS

- Full-strength and ready to use.
- Two dilution options for sanitizing.
- EPA registered hospital disinfectant with lowest toxicity category—gentle enough for daily disinfecting and sanitizing.
- NSF registered “no rinse on food-contact surfaces” sanitizer.
- Certified by the Carpet & Rug Institute for pet stains and odor.
- Effective disinfectant that kills 99.999% of bacteria and viruses, including H1N1; MRSA; Norovirus; HIV; Legionella; Pseudomonas aeruginosa; Hepatitis A, B and C; Ebola virus; and others (see testing summary).
