

SANI-TRED® QUICK PATCH

SANI-TRED® Quick Patch is a two-component polyurea repair system formulated to effectively restore concrete and masonry substrates. Designed to penetrate deeply into the pores of the concrete, Quick Patch creates a permanent molecular bond with the surface. This superior adhesion provides long-lasting protection and performance that surpasses many traditional repair materials. Once cured, repairs achieve approximately 2,200 psi tensile strength and up to 35% elongation, delivering both strength and flexibility for durable results.

Concrete repair plays a critical role in maintaining the functionality and appearance of residential, commercial, and industrial environments. Properly restored concrete ensures surfaces remain safe, structurally sound, and visually appealing. True repair requires more than simply covering imperfections — it demands a product that bonds to the substrate and maintains durability comparable to the original surface. High-quality patching materials like Quick Patch are engineered to fill cracks, holes, and surface defects while providing exceptional strength and long-term protection..

ACCESSORIES:

Quick Patch 2 gallon Kit

SKU: SI-1652

Quick Patch Thickener

SKU: SI-1653

Half Pint Squat Cups Half Pint

SKU: TL-7361

Squat Cups Pint

SKU: TL-7363

Squat Cups Quart

SKU: TL-7365

GREAT BENEFITS

- Repair cracks, chips, divots, spalling, and more
- Protects against freeze/thaw damage
- Resistant to most oils, solvents, caustics, and acids
- Quick turnaround
- Accepts most coatings
- Non-Hazardous
- Non-Toxic
- Solvent Free
- Low VOC
