

# 10 GAUGE CORD

This heavy-duty, cold-weather PVC-coated extension cord features a patented CGM (Continuous Ground Monitoring) connector for enhanced safety. The CGM system confirms proper ground continuity within the circuit, indicated by a green light when the connection is secure. Additionally, the lighted amber male plug signals that power is actively flowing through the cord.

A 10-gauge extension cord is the thickest and most heavy-duty option available, designed to deliver maximum power over longer distances with minimal voltage drop. Compared to smaller gauge cords, it maintains stronger, more consistent power delivery. When operating outdoor equipment that requires higher amperage, a 10-gauge cord is the ideal choice. It ensures reliable power to 110V equipment—especially motor-driven tools and appliances—since running a motor on insufficient voltage can lead to permanent damage.

## ACCESSORIES:

**WARRIOR GENERATOR**

SKU# WE-22KVA

**HUM-B**

SKU# PB-7169

**SHOT BLASTER**

SKU# BW-SB6

## GREAT BENEFITS

- Manufactured to 10/3 AWG (American Wire Gauge) specifications
- Each of the three conductors contain 104 strands of 30 AWG 100% copper wire
- All copper is soft drawn & annealed for maximum flexibility under full load
- SJTW outside jacket is rated at 300 volts
- Heavy duty molded on 15A-125V NEMA 5-15 plugs & connectors that will not pull away from the cord body
- Lighted amber Power Check plug
- Lighted green Ground Check connector
- Cold weather PVC insulation and jacket guarantees working flexibility in temperatures down to -40°F
