

Transformer 800#

The Concrete Protector's Transformer 800# is a red 3"x 3" MM Velcro-backed resin diamond polishing pad designed for dry concrete polishing. Ideal for refining hard surfaces and enhancing gloss, it is primarily used in the final stages of the polishing process. The Transformer 800# is compatible with lightweight single-disc grinding machines for efficient and professional results.

GREAT BENEFITS

- Flexible dry resin achieves a high gloss and clarity
- Best solution for edge and corner floor polishing
- Especially designed for lightweight single disc machines
- Ideal choice when water is not available
