

TRANSFORMER 800# 4 X 3MM VELCRO BACKED PAD

The Concrete Protector's Transformer 800# 4 x 3mm Velcro-Backed Pad is a high-performance polishing tool designed for a range of concrete surface preparation tasks. Engineered for durability and precision, it delivers consistent, smooth finishes, making it an essential tool for contractors.

With an 800# grit rating, this pad is ideal for mid-to-fine stage polishing, transitioning surfaces from heavy grinding to a refined finish. Its Velcro backing ensures easy attachment and secure placement on polishing machines. The Transformer 800# 4 x 3mm pad is perfect for refining and smoothing concrete, removing minor imperfections, and preparing the surface for finer grit polishing steps.

GREAT BENEFITS

- Delivers consistent results
- Velcro backing allows for quick and easy pad changes
- Can be used both wet and dry
- The 4" size offers more precision in polishing edges, corners, and smaller areas
