

EDGING TOOL SEMI-METAL 100#

The Concrete Protector's 5" Semi-Metal 100# Edging Tool is a diamond abrasive designed to deliver a medium level of cutting action during concrete polishing. The 100-grit bond provides a balanced level of abrasiveness, allowing for effective material removal while beginning to refine the surface profile.

Specifically designed for detailed edgework, this tool helps create a smooth transition between edge and field areas, making it ideal for use in the intermediate stages of the concrete polishing process.

ACCESSORIES:

SCP CUTTER

sku# SCP-6103

SCP HARDENER

sku# SCP-6107

SCP SEALER

sku# SCP-6113

SAMSON

sku# WE-2618

HYDROPOLISH

sku# SCP-6169

GREAT BENEFITS

- Can be used with most grinders
- Long life depending on hardness or softness of concrete
- Essential to the Scientific Concrete Polishing process
- Can be used wet or dry
- Heat dissipation
