

# EXTRA SOFT SINGLE-ARROW 16/20 DIAMOND TOOL

The Concrete Protector's Extra Soft Single-Arrow 16/20# Diamond Tool is engineered with proprietary diamond technology and a highly durable bonding structure featuring a specialized composite metal matrix. This combination delivers a tool capable of continuous cutting performance while resisting premature bond breakdown and excessive wear.

The extra soft bond matrix is designed to continuously expose fresh diamonds during use, maintaining a consistent cut and preventing glazing when grinding harder concrete surfaces. It is important to note that when used on softer concrete, diamond life may be reduced due to the aggressive nature of the bond.

Single-Arrow diamond tools are directional and must always be operated in the direction indicated by the arrow on the segment. Due to their aggressive cutting action, single-segment tools are commonly used in the initial grinding stages to effectively open the concrete surface before transitioning to double-segment tooling.

**ACCESSORIES:**  
**WARRIOR GRINDER**  
Sku# WE-1776 - 3543

## GREAT BENEFITS

- Extra soft bond is effective for the hardest concrete floors
- Long life
- Ideal for coating removal and grinding of concrete
- Best performance if used on 5000-6000 PSI concrete (Mohs Hardness Scale 7, 8 or 9)
- Optimized diamond matrix for fast and efficient epoxy removal
