

## **POLY BURNISH PAD 1500#**

The Concrete Protector's Poly Burnish pad 1500# is a burnishing pad designed to provide a high gloss to soft or medium finished floors.

This pad is typically used in floor maintenance and restoration processes. Its purpose is to provide a high level of abrasion to the floor surface, helping to remove scratches, scuff marks, and other imperfections. The "1500#" designation refers to the grit level or abrasiveness of the pad, indicating it's relatively fine and suitable for polishing and finishing floors. These pads are commonly used after heavier grits to refine the floor surface and achieve a smoother, more polished appearance.

### **ACCESSORIES:**

**VAPOR PROPANE TANK=**  
SKU# SCP-6145

**POLISHER/BURNISHER=**  
SKU# SCP-6161

### **GREAT BENEFITS**

- 3-inch center hole
- Available in 20" and 27"
- For frequent burnishing
- Blended polyester and natural fibers
- Use on machines up to 3,000 RPM
