

## SPIKED SHOES

### BUCKLE

The Concrete Protector's Spiked Buckle Shoes are standard spiked shoes which are constructed of durable polypropylene and are available with 3/4" spikes. The 13 spikes are configured in the footbed to provide maximum balance and prevent toe-tipping. One size fits all. This allows the applicator to walk on wet product to achieve uniform coverage of epoxies, sealers, and other products.

### GREAT BENEFITS

- 3/4" Replaceable Spikes
- Steel Constructed
- Quick-release snap-buckle strap system
- Third strap guarantees a non-slip fit

### SHOE IN

The Concrete Protector's Shoe-In Spiked Shoes are the safest and most stable shoes on the market. Thanks to its patented technology and user-friendly design, they are very easy to get on and off the shoes. There are no straps to drag or break, and no nuts that are going to come loose and fall off. These shoes can be used for many different applications, such as epoxy coatings, overlays, decorative concrete, and self-leveling. The Spiked Shoes come standard with 3/4" metal sharp needle spikes.

### GREAT BENEFITS

- Easy hands free on and off. Fits over most shoes. Lightweight, comfortable
- Safer, more stable. No left or right
- No straps, buckles, adjustments, just slip on
- Medium, Large, and Extra Large Sizes
