

# MAGIC TROWEL

The Concrete Protector's Magic Trowel resembles a squeegee but performs more like a precision finishing tool. Featuring a flexible rubber working edge, it is designed to skim-coat uneven surfaces, remove trowel marks, and create a variety of decorative textures and knockdown finishes on walls and ceilings. It can also be used to replicate existing textures or develop entirely new surface designs.

This professional-grade tool is engineered with a flexible blade that smooths compounds efficiently without leaving trowel lines, helping reduce labor and improve finishing consistency. It is ideal for use with decorative concrete topcoats, epoxies, and cementitious texture systems.

Constructed with a durable steel handle and a rubber grip adapter, the Magic Trowel provides improved comfort and control, helping reduce user fatigue during extended use.

**ACCESSORIES:**  
Wood Handle Threaded  
SKU: TL-7393

## GREAT BENEFITS

- Rubber blade tips are ideal for smoothing
- Wipes down easily
- Eliminates trowel lines, chatter marks and grooves that metal knives and trowels leave
- Handle is threaded to accept any standard coarse thread extension pole.
- Flexible blade
- Stainless steel handle with non-slip grip
