INSTRUCTIONS

- 1) Mix the correct amount of water into a container that can hold the entire contents.
- 2) Pour mixed solution into a low pressure sprayer and ready for application.
- 3) Spray dye to lightly wet surface without creating puddles.
- 4) Use a micro-fiber to work dye into concrete
- 5) Allow the surface to dry.
- 6) For a more vibrant finish, a second coat may be applied to the concrete. Follow the steps above to reapply the second coat. Additional coats beyond two are not recommended as they usually do not produce further results.
- 7) Allow second coat to dry
- 8) Following your last dye application, it is mandatory that you clean the floor using water, a scrub brush, and a vacuum. If possible use an auto scrubber and a soft brush or pad as the most effective method.
