SECTION 5: FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Dry chemical, foam, carbon dioxide water spray or fog is recommended. Water spray is recommended to cool or protect exposed materials or structures. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.

Unsuitable Extinguishing Media: If water is used, use substantial quantities of cold water.

Specific Hazards in Case of Fire: Propane is a highly flammable fuel. Sources of ignition can create an explosion when in contact with propane. **Fire-fighting Procedures:** Isolate the immediate hazard area and keep unauthorized personnel out. Move undamaged containers from the immediate hazard area if it can be done safely. Water spray may be useful in minimizing or dispersing vapors and protecting personnel. Water may be ineffective but can be used to cool containers exposed to heat or flame. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

Special Protective Actions: Wear NIOSH approved self-contained breathing apparatus in positive pressure mode with a full-face piece. Boots, gloves (neoprene), goggles, and full protective clothing are also required. Care should always be exercised in dust/mist areas

Eating, drinking, and smoking in work areas is prohibited.
Read the Operator Manual thoroughly

Ventilation Requirements: Use only with adequate ventilation to control air contaminants to their exposure limits. The use of local ventilation is recommended to control emissions near the source.

Storage Room Requirements: Remove the propane tank, and store in an approved outside location. Store the machine in an indoor, climate controlled location with low humidity

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Eye Protection: Wear eye protection.

Skin Protection: Vibration from machinery may cause numbness or tingling of the fingers in certain people. Smoking, dampness, diet, and heredity may contribute to the symptoms. Wearing warm clothing, gloves, exercising, and refraining from smoking can reduce the effects of vibration. If the symptoms still persist, discontinue operation of the machine.

Respiratory Protection: N/A

Appropriate Engineering Controls: Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Long or continuous exposure to high noise levels may cause permanent hearing loss. Always wear hearing protection while using this machine
