LIMITATIONS

- Designed specifically for grinders that can accommodate the 3-pin system
- May experience wear and tear over time
- Depending on the material and build quality, the adapter may have limitations regarding the amount of force or pressure it can handle during grinding operations

BENEFITS

- Rapid swapping of grinding tools
- Requires fewer tools and less effort to secure or remove grinding plates
- Enables the use of various 3-pin grinding and polishing attachments, making it versatile for different surface preparation tasks like concrete grinding, polishing, or coating removal.

INSTRUCTIONS

- 1) Align the AZTEC Quick Change to 3 Pin Adapter with the mounting holes or posts on your grinder's drive system.
- 2) Ensure the 3-pin alignment is correct so that the adapter seats properly onto the grinder's head.
- 3) Use the provided screws, bolts, or a mounting mechanism to securely fasten the adapter to the grinder.
- 4) Tighten the screws evenly to avoid any misalignment or wobbling during operation. Make sure all screws are snug but avoid over tightening, which could damage the adapter or grinder.
- 5) Once the adapter is securely in place, attach the grinding or polishing tool to the 3-pin system. Simply align the tool's holes with the pins and snap it into place. Some quick-change systems may use a locking mechanism to ensure the tool stays secure during operation
