INSTRUCTIONS

- 1) Align the edging tool to the grinder's pad holder and press firmly to secure it.
- 2) Set the grinder to an appropriate speed for edge polishing. Medium speeds are typically effective for a 399# grit tool, providing control without excessive pressure.
- 3) Start polishing by moving the tool along the edges of the concrete surface, keeping even, consistent pressure. Move in a back-and-forth or circular motion, overlapping slightly to ensure a uniform finish
