### INSTRUCTIONS

1. Identify the area on the hand masker where the cutting blade will be attached. This is usually at the front or along the edge of the masker where the material feeds through.
2. Position the cutting blade on the hand masker.
3. Use a screwdriver to tighten the screws securely. Be careful not to over-tighten, as this could damage the blade or the hand masker.
4. If the blade is not cutting properly, adjust its position slightly and retest until you achieve the desired cutting performance.
