LIMITATIONS

- Moisture content must be sufficient to ensure reaction
- Mandatory to add 15X Accelerator to ensure a complete reaction as designed
- Do not mix more material than the amount that will be pumped within a reasonable time
- High temperatures and high humidity decreased gel-time.

BENEFITS

- 100% solvent free
- 100% solids
- The reacted material essentially does not shrink or swell.
- Can be applied as a non-shrink, high strength soil stabilization grout when used with a reduced accelerator ratio

SANI-TRED GROUT

INSTRUCTIONS

- 1) Drill a hole in the location of the leak using a 1/2" Masonry Drill Bit
- 2) Insert a SANI-TRED ZERK into the drilled hole. Make sure that the entire 'rubber portion' of the SANI-TRED ZERK is inserted into the hole.
- 3) Using a wrench, turn the 'hex portion' of the SANI-TRED ZERK clockwise until the SANI-TRED ZERK creates a positive seal within the hole. When the hex portion of the SANI-TRED ZERK is turned clockwise it compresses the 'rubber portion', expands the SANI-TRED ZERK inside the hole, and this creates a positive seal.
